## Company Introduction

Founded in 1979, in Osaka, Japan, **sanwacompany** is a Japanese housing equipment and building materials company with an in-house design team and an e-commerce website.

We provide a variety of household appliances for personalizing your space, such as kitchens, washbasins, baths, fixtures, and exterior housing materials as well as building materials such as tiles, bricks, flooring, natural stones, and glass.

**sanwacompany's** original products are developed around the design concept of "minimalism" have a high international reputation and have garnered numerous design awards.

- **Company name:** sanwacompany ltd.
- **Address:** 21F, 19-19, Chayamachi Kita-Ku, Osaka, 530-0013, Japan
- **Founded:** August 22, 1979
- **Website:** <https://info.sanwacompany.co.jp/en/>

## Company Introduction

### Strength 1:

### Internationally Recognized Design

Sophisticated design products are essential to provide a stylish space. Our in-house products that are developed around the design concept of “minimalism” have a high international reputation and have garnered numerous design awards. This includes the “Salone del Mobile. Milano Award” at the Milano Salone International Furniture Fair in 2018, where **sanwacompany** was honored to be the first Asian company to receive the award.

### Strength 2:

### Variety of Products for Total Coordination of Your Space

**sanwacompany** offers a wide selection of products for personalizing your space, many of which are rarely seen in typical houses built for sale. Our main lines are modular kitchens, washbasins, baths, and other products all developed in-house, as well as products selected from manufacturers all over the world to be sold exclusively through **sanwacompany**.

## Company Introduction

※ Especially in Japan

### Strength 3:

## Innovating the Industry with “One Price” for All Customers

We have defied conventions of the general building industry by offering products at the same price under the same conditions regardless of who purchases them, bypassing intermediaries that increase costs.

By simplifying the complicated distribution process, we eliminate the ambiguity in sales price, offer easy-to-understand pricing and reasonably process high-quality products.

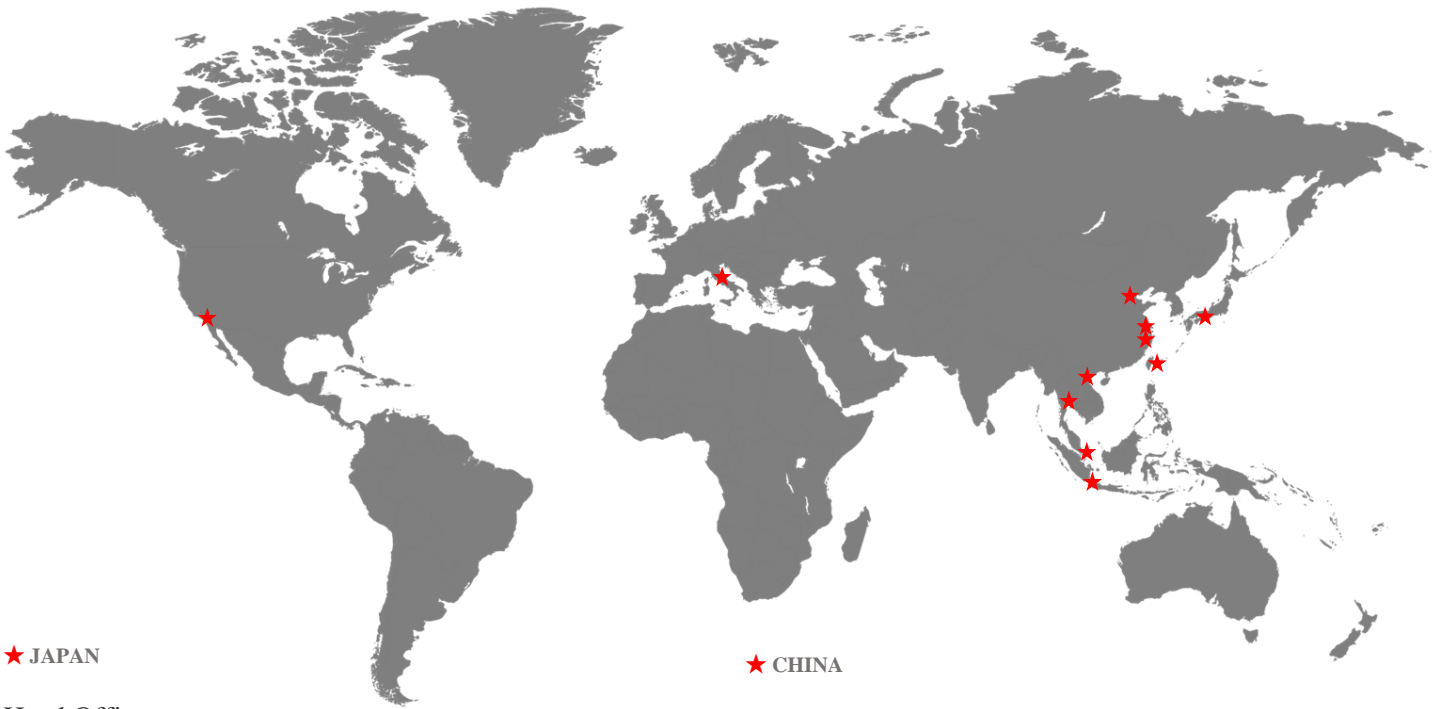

## Company Introduction

## Exhibition at Milano Salone

The largest international furniture trade fair in the world, “Salone del Mobile Milano” is held in Milan, Italy. This event not only enhanced our brand value but also provided a trigger for expanding our overseas business. **sanwacompany** exhibited at a biannual event “EuroCucina” (International Kitchen Exhibition) in this fair in 2016 and subsequent 2018, presenting sanwacompany brand to the world.

## From a showing-off to an attractive kitchen

"Witte" has achieved high design at a price range that is easy for many people to reach.

While valuing the realistic texture, we are particular about the beauty of the details and finished it in the ultimate minimal design with outstanding edges. The floating style floats in the air creating a lightness that doesn't become too heavy. It is a kitchen that will become the standard in the future, sublimating the Living-Dining-Kitchen room into a space that people want to gaze at.

**12 color variations in pursuit of a realistic texture**

The main body of the kitchen is available in 6 colors that express a solid feeling like mortar, an aging feeling like rusted metal, and aged wood grain. The handle and architrave are available in two colors: silver and black for a sharper impression. Please enjoy the coordination that matches the interior by combining them freely.

**1. Square sink**

The sink also pursues a minimal design. It has a stylish finish with a square form that suppresses the roundness of the corners.

**2. Storage cabinets on the both front and back side**

In the face-to-face plan, we have a 915 mm depth type with a storage space on the dining side..

**3. Fastening process to create sharp edges**

The corners are cut at an angle of 45 degrees and welding joint together to create a beautiful edge while consolidating the lines into a single line.

**4. Sufficient storage space**

The drawers are wide and deep enough to accommodate pots and cooking utensils. Since it can be pulled out by hand, there is no need for a handle, and the appearance is neat.

## **High-grade model with attention to detail**

A high-end model with attention not only to detail but also to the user experience.

The 6 cm thick stainless-steel worktop and large sink are installed by our highly skilled craftsmen. The storage that uses Blum's soft close drawer rails can be closed quietly and has enough storage capacity to clean up small items around the kitchen. The height of the drawers and materials such as stainless steel and mirror sheets (only the mirror type is used) make it easy to clean the kitchen.

**1. All 6 cm thick stainless-steel worktop is handmade**  
From cutting, bending, welding to polishing, Japanese craftsmen carefully finish each piece.

**Drawer with excellent storage capacity**

In addition to the inner drawer that makes good use of dead space, the worktop is equipped with a small drawer for cutlery (knives, forks, spoons) and chopsticks

**2. Highly acclaimed by professionals, the spacious sink is craftsmanship**

The 80 cm wide square sink was made by a craftsman who produces professional kitchens, and the craftsmanship shines.

### 30 cm high plinth for convenience

The plinth is made 30 cm to become a shallow drawer storage. This reduces the forward bending angle of the person who cooks every day and reduces the burden on the lower back.

## Simple form stands out

### All stainless steel\* frame kitchen

The simple design with the minimum necessary functions makes the kitchen look sleek and sophisticated. It is also attractive that you can arrange it according to your lifestyle, such as adding shelf boards and installing storage. Also, in addition to the stain-resistant stainless steel, the breathability and ease of cleaning unique to the frame kitchen allow you to keep it clean at any time. It is a kitchen with a high interior quality that meets the needs of users.

### 1. Sophisticated all-stainless

The material is stainless steel with a sense of luxury and cleanliness. The hairline finish moderates the luster and gives it a more sophisticated impression.

### 2. Don't show extra lines

There are no seams or steps between the sharp framework top and the curtain board, giving a clean impression. The texture of stainless steel stands out.

### 3. Removable front frame

You can freely use the space under your feet by removing the frame. \* The parts that can be removed differ depending on the installation type.

### 4. Efficient use of space (optional)

By adding a punching bottom counter, cooking utensils can be neatly stored.

## **The culmination of artisan craftsmanship Made in Japan system kitchens**

“Plain K Medium” is an original kitchen featuring large-capacity pull-out storage and simple design.

A variety of options such as IH cooking heater and dishwasher are available for various layouts.

Plain K is a fully custom-built system kitchen from Japan. There are various layouts and options to choose from.

## Plain-K Medium

The popular "Plane K Petit" is popular not only for its simple design, but for its many choices of faucets and heating equipment.

In addition to the clean white color, black has been newly added as a color variation that gives an urban and chic impression. Black with low gloss tightens the space and harmonizes with modern interiors and furniture. In a one-room apartment or a two-family house, you can achieve a more realistic kitchen space at a reasonable price.

### Kitchen Color

A black and white photograph of a compact kitchen island. The island is a dark, rectangular block with a stainless steel sink and a modern faucet on top. A black cylindrical object, possibly a coffee maker, sits on the island to the left of the sink. Above the island, a thin black wire is suspended from the ceiling, forming a geometric shape with three points. The background is a plain, light-colored wall. On either side of the island, there are woven baskets hanging on the wall. The floor is light-colored with a subtle grid pattern.

# Sency

| Compact Kitchen

made in Japan

Sency made full use of metal texture such as steel and stainless steel. Making the worktop and sides as thin as possible, it turned out in a simple, sharp and sophisticated design. The embossed paint allows a high-quality matt texture of the cabinet, and one cannot easily notice soiling on the surface with a special process.

Flat bar legs (Optional)

By making the thickness of the worktop and sides as thin as possible, the elements are reduced to their limits thus giving birth to a design composed only of lines and faces that harmonizes broadly not only with the modern spaces but also with the trendy industrial ones.

White

Black

With its lean and simple design, it goes well with not only modern spaces but also trendy industrial spaces.

# Mortana

| Compact Kitchen

## Compact mortar kitchen that expresses modern personality

Even if you stick to the space design, you can't find a compact kitchen that harmonizes there. "Mortana" is recommended for designers and rental owners who have such thoughts. A minimal design that reduces the feeling of living by narrowing down only the functions necessary for the kitchen. It can also be used as a sub-kitchen for single-person designer apartments, offices, stores, and two-family homes.

# Minimorous

| Compact Kitchen

made in Japan

## Realization of a free space that is refreshing under your feet

The leg is minimized down as much as possible to have an open space under the worktop. You can put large baskets and storage boxes that normally could not fit in a general kitchen, or you can sit down with a chair to do housework.

Handmade kitchen carefully crafted by skilled craftsmen with stainless steel processing.

Spacious, easy-to-use sink.

The small part in front of the worktop is cut diagonally.

Peninsula type

Wall type

Improving a sleek impression by cutting the edge diagonally so that the top plate looks thin. By adopting a kitchen sink that can be used in a wheelchair and a shallow sink, you can use it smoothly even while sitting in a wheelchair.

Specification

Width: 750/900/1200 / 1500mm

Height: 850mm Depth: 500 / 600mm

Finish: Body Stainless steel (SUS430) No.4

Finish: Top board stainless steel (SUS430) No.4

Load capacity: 20kg

# Compact Kitchen 430

| Compact Kitchen

made in Japan

With the image of a stainless-steel box, we have pursued a simple design by eliminating the handles that give a feeling of unevenness. This is a stainless-steel kitchen that has won the Good Design Award for its "minimal style," which eliminates waste to the limit. It is easy to adapt to the background, and the layout and layout can be expanded.

Design work is done by craftsmen even in small areas, and we offer high quality above the price. It is a kitchen that can meet all needs such as designers' condominiums, senior condominiums, and second kitchens.

# Grad 45 Compact

| Compact Kitchen

made in Japan

The brand-new compact size of "GRAD 45" is packed with sanwacompany's passion for technology and design.

It realized a renewed design giving a high-class look to the kitchen and paying great attention to details, such as side panels and fastenings not showing the edge of the doors. The vibrant finish of the stainless steel softens the glossy effect thus allowing its blending with different spaces.

The use of special fastenings with the made-in-Japan excellent metal processing technology, as well as the 45-degree cuts at the joint of the drawer and cabinet, provides a beautiful sense of unity that hides small edges.

A stylish sink with sharp corners reflects Sanwa Company's craftsmanship technique. The fine vibrant finish gives a soft expression to stainless steel that obtains the typical texture of traditional Japanese handmade paper.

# Fine

| Vanity

made in Japan

“Fine” is a wash-stand whose frame design is the concept.

The thin frame of the stand and the matching mirror maximize the sense of space in your bathroom.

Dimensions W600/750/900 x H800 x D500mm  
Material: Polyester artificial marble

Because all of the screws are hidden within the design, Fine looks very simple and neat. Delivery is easier and the ultra-thin design allows for plenty of work-space while your bathroom is being installed.

There are two choices of color for Fine bowl, grey or white. The shelf board and drawer come in 2 color of black and white, allowing you to coordinate to suit your own personal taste.

## Fine Mirror

These mirrors from the same series can be coordinated to create a sense of unity.

# Cara

| Washbowl

made in Japan

“Cara” - a washbowl of minimum thickness and flat surfaces, enabled by proud Japanese metal processing in both plating and welding.

Great performance is exerted in wet areas due to the base stainless steel with a hybrid coating (organic/inorganic) with high hardness and durability and low pollutants.

# Cara

The matte monotone texture adds modern taste to a space, and open shelf provides a neat storage for bath items.

Right-angled bend process was used during plating, to realize a sharp and simple design for ultimate minimalism for any space. Unlike ceramics, high-temperature firing is unnecessary, contributing to a CO2 emissions reduction effect.

# Asse

| Washbowl

made in Japan

## Mastering the Trend of Thin Edge Lines

The trend in recent years has been for washbasins to have thin edges. “Asse“ with stainless-steel material – has achieved a thin edge line that cannot be expressed in artificial marble or ceramic. By using a right-angled bend process taking advantage of Japanese metal processing techniques, it is only expressed as lines and surfaces without R-corners.

The user-friendly storage shelf adds an eye-catcher for the design. Drain hardware, including a perforated plate, is completely hidden to realize the beautiful design from every angle. Due to the metal material, the product is crack resistant. A hybrid inorganic/organic coating with high hardness and excellent stain and weather resistance is used for the coating.

Since it is a place that is used every day, it has been renewed in consideration of its beauty and ease of use, its resistance to dirt, and its ease of maintenance.

We also offer a full range of options for upgrading the bathroom to provide a comfortable space as you wish.

### Clean Floor

The edge of the floor is raised, making it stain-resistant and waterproof. In addition, the floor surface is uneven to prevent slipping and to make it easy to dry.

Stylish without feeling like "storage"  
Stainless steel mirror shelf

※イメージです

### Bubble bath at home!

Ultra fine bubbles, which are too small to be seen by the naked eye, are generated when the water is heated and when the water is reheated. The effect is expected to have a warming effect that keeps the body warm to the core, a cleaning effect that makes it easier to remove sebum and dirt, and a beautifying effect that increases the moisture content of the skin.

# Shower Booth 700

| Shower Booth

made in Japan

## Elegant Shower Time Surrounded by High-Quality Design

Shower booths are ideal for today's busy lifestyles, allowing you to work up a sweat more easily than taking a bath. Enjoy a moment of healing in a premium space with both design and functionality in a space-saving design.

In addition to the existing two colors of white and black, the wall panels now come in the same four colors as sanwacompany's "NOVUM" system bath.

The floor is designed to be comfortable for wet feet, and is coordinated with the wall panels in the same color. In addition to the environmentally friendly wall panels, stylish vertical mirrors, and other high-grade components, options are available to further enhance the luxurious feel of the shower stall. Three ceiling heights and two depths are available, and the 0712 size can be arranged to suit your needs, including the option of a single swinging door.

[Basic Components] Ceiling panel: Decorative steel plate (Grace White)  
 Wall panel: Decorative steel sheet (Grace White, Black Random Line, Low Light, Travertine Classico, Sumi Mortar, Low Gray) Low Gray)  
 Floor panel (waterproof pan): FRP (medium white, medium gray)  
 [Drainer cover and drainer trap: Resin drainer eyelet / drainer trap with hair catcher

# Traspa

| Shower booth

**The space looks spacious and clean.**

Minimal design wrapped in glassThe shower booth "Traspa" is designed to be as simple as possible, consisting of only the minimum number of elements. It is made of tempered glass, which is highly durable and maintains a sense of openness in the space without being overly conspicuous.

**Composed of a minimum number of parts**  
 “Traspa” is composed of the minimum number of parts, with no waste down to the smallest detail. The corner joints have been made as thin as possible to create a beautiful shower time as if it were made only of glass.

White Floor

Black Floor

# Balnea

| Half Unit Bath

**A half-unit bath that realizes a discerning space is born**  
You want a stylish bathtub in your bathroom. However, the waterproofness of the unit bath and the ease of maintenance are also hard to get rid of. The "Balnea" has been long awaited by such people and has finally been born.

This is a so-called "half unit" that combines the advantages of a unit bath with those of conventional construction. The bathtub is designed to be easy to use, with the piping for the reheating system, which would normally be exposed between the walls, is placed under the floor. The structure prevents the drainage from the bathtub from flowing into the washing area. You can choose your favorite bathtub and tiles to create the bathroom you want.

The lower part of the space is packaged with the advantages of a unit bath, making it easy to choose wall and floor combinations.

The upper part of the space can be finished freely using conventional construction methods, and is recommended for cases with windows and beams. Enjoy coordinating with Sanwa Company's original bathtubs, which are popular for their modern design.

## Wall – Floor Tile

The walls and floors are porcelain tiles with a luxurious feel. You can choose from 3 combinations.

\*The combination of wall and floor tiles cannot be changed.

Ash gray

Amber

Lamp Black

## Bathtub

You can combine with sanwacompany's original bathtub "Barca", or "Groovy Eight".

# Ofree Highback

| System-Bath

Enjoy the best bath time at home, as if you were spending time in the bus space of your hotel. The headrest, which stands up in an organic form, allows you to relax and relax, giving you a sense of security as if you were wrapped up. The inside of the bathtub has a smooth texture that is gentle on the bare skin, and the outside has a matte texture with a high-quality feel. Whether you're soaking in it or looking at it as a space, you'll feel comfortable and satisfied.

Size: W1590 × D800 × H724mm  
Weight: 61kg  
Capacity: 200L  
Body: acrylic

プロダクトデザイナー

The high-back type of bathtub "Ofree" was shaped with product designer Hitoshi Kuramoto.

# Ofree Pillow

| System-Bath

**A soft form that frees your vision and body.**

Pillow type has a generous curved form that makes you want to touch it. The gently sloping headrest provides moderate support for both head and body. There is no rise as in the high-back type. It is recommended for those who want to refresh themselves with a feeling of openness. The headrest is not raised as in the high-back type. Enjoy a superb moment when both your vision and body are free!

Size: W1600 x D900 x H635mm

Weight: 36kg

Capacity: 195L

Body: Acrylic

(Only the outside has a matte finish)

Legs: Adjustable height with adjuster  
(approximately 10mm)

[Country of origin] China

A seamless fluffy texture is reproduced

# Quadro Slim

| Door

## Glass partitions of high quality design

"Quadro Slim" is an extension of the ancient Japanese sliding door culture. The minimalist design with a 16mm frame and glass inlay creates a connection between spaces and creates a quality atmosphere of unobstructed space.

Two frame colors, black and white, and four glass colors, clear, white, bronze, and gray, are available.

# Quadro Slim

It functions as a partition that keeps a delicate sense of distance as if there is a "fusuma" in the same space.

The minimalist design with glass inlaid in a 16mm frame creates a connection to the space and creates a high-quality atmosphere with nothing to shield.

Unparalleled high-end luxury fittings expand the possibilities of space production

# Noppo

| Door

made in Japan

## The 2400 mm height of the fittings

The "NOPPO" boasts a height that reaches up to the ceiling, a color range that can be coordinated with sanwacompany's storage and other products, and an abundance of item variations.

The new addition of a slim frame that gives a more minimalist impression and an in-wall sliding door that fits neatly even when left open have improved the ability to respond to spatial design needs.
